Education

AKTU/IMS Engineering College

2020-2024

B.Tech in Computer Science And Engineering

CGPA: 8.19

Kendriya Vidyalaya - CBSE

2018-2019

Intermediate-PCM

Percentage: 83.4%

Experience

Software Engineer

March 2025 – Present

Thales (Client) – L&T Technology Services

- Built internal web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) to streamline internal workflows, implementing REST APIs, backend logic, and responsive frontend interfaces
- Designed and implemented Python services to simulate secure filesystem operations, building workflows for encryption/decryption handling and improving system reliability
- Built Python and Kubernetes-based tooling to validate secure microservices deployment, implementing logic for container isolation, encryption workflows, and system resilience checks
- Strengthened overall platform security by analyzing system behavior, developing internal automation utilities, and partnering with engineering teams to resolve 50+ critical issues

Full Stack Developer Trainee

June 2023 – July 2023

CETPA Infotech Pvt. Ltd.

Ghaziabad

- Developed and maintained web applications using HTML, CSS, JavaScript, and React, leading to a 15% improvement in user experience and site performance.
- Developed a responsive web application using React JS as part of a university project.
- Proficiently employed Postman for testing and data retrieval, ensuring robust API performance and data integrity.

Projects

Mern Estate App | *MongoDB, Express JS, React JS, Node JS*

- Optimized frontend performance, reducing page load times by 40%, which contributed to a 15% decrease in user bounce rates and improved overall user satisfaction.
- Minimizing database query times by 30%, leading to faster and more responsive user interactions.
- Implemented secure authentication features, reducing unauthorized access incidents by 40%.
- Leveraged MongoDB, Express.js, React.js, and Node.js to create a scalable and efficient platform, improving overall application performance by 20%.

Automated Security Configuration Auditor | *Python, Linux, SSH, React JS, Node Js, MongoDB, Docker*

- Reduced manual security audit time by 90% by automating CIS benchmark checks across 50+ Linux servers via SSH remote execution.
- Improved audit speed by 5× using ThreadPoolExecutor for parallel multi-server scanning with efficient connection pooling.
- Enhanced compliance monitoring with centralized dashboard showing real-time metrics and automated PDF/CSV reporting.
- Increased audit consistency to 99.9% through configuration-driven architecture supporting 20+ security checks.
- Boosted system reliability with error recovery for network failures and auto-remediation suggestions for failed checks.

Skills

Programming Languages: HTML, CSS, JavaScript, C++, Python

Database and Language: SQL, MongoDB

Frameworks: React JS, Express JS, Node JS

Tools: Git, Visual Studio code, Adobe XD, Docker, Kubernetes, Linux

Leadership / Extracurricular

Runtime Hacker : Coding Club

January 2023 – July 2023

Core Member

IMS Engineering College

- * Mentored 10+ individuals, resulting in accelerated skill development and increased retention within the community.
- * Coordinated and executed hackathons, boosting participant skill levels by 25% and increasing team collaboration.
- * Launched a peer review system, enhancing code quality by 20% and expediting project completion by 15%.
- * Led chapter of 30+ members to work towards goals that improve and promote community service, academics, and unity.
